Over 52.5 mn enrolled for Atal Pension Yojana

PRESS TRUST OF INDIA
New Delhi, May 11

OVER 52.5 MILLION subscribers have enrolled in Atal Pension Yojana (APY), the government's flagship social security programme launched eight years ago, the finance ministry said in a statement. The scheme was launched on May 9, 2015, by prime minister Narendra Modi with the objective of delivering old-age income security to all citizens of India, particularly to the workers in the unorganised sector.

"The scheme has been implemented comprehensively across the country, covering all states and Union Territories with total enrolments crossing the mark of 5.25 crore," the ministry said in the statement.

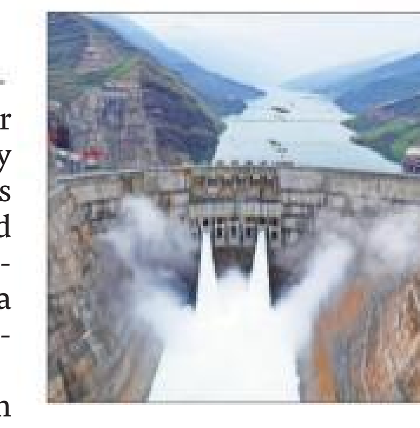
APY enrolments have continuously shown an increasing trend since its inception, it added. In new enrolments, there has been a growth of 20 per cent in 2022-23 over 2021-22.

As of date, the total assets under management (AUM) in APY is more than ₹28,434 crore and the scheme has generated an investment return of 8.92% since inception of the scheme.

Under APY, a subscriber would receive a lifelong minimum guaranteed pension of ₹1,000 to ₹5,000 per month from the age of 60 years.

Reservoirs' level down marginally

FE BUREAU
New Delhi, May 11



WATER LEVEL IN India's major reservoirs has marginally dropped below the previous year's level while the stored water is still much above the 10-year average, according to data by the Central Water Commission (CWC) on Thursday.

Currently no large impact on the summer crops such as paddy, oilseeds and pulses is seen as stored water is still much above the 10-year average.

According to the CWC data, water level of the country's 143 reservoirs stood at 59.79 billion cubic metres (bcm) at present, which is 34% of their combined capacity.

A year ago, the water available in these reservoirs was 59.93 bcm, and the average of the last 10 years was 48.82 bcm. "Current water level of reservoirs was 99.76% of the live storage of the corresponding period of last year and 122% of storage of the average of the last 10 years," the CWC stated.

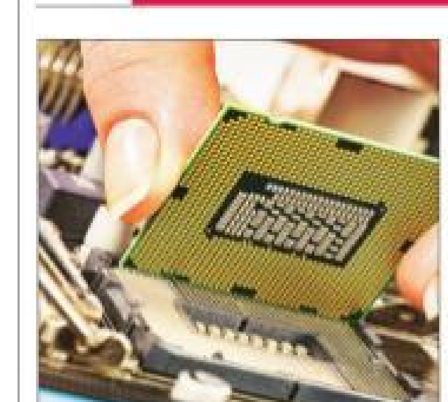
Of the reservoirs whose water levels are monitored by the CWC, 112 are located in the west, central and southern regions. Water levels in 21 major dams in eastern regions especially in West Bengal, Bihar, Jharkhand and Odisha, have been better than than the corresponding period of last year and less than last 10 years average.

In case of 40 reservoirs in southern region and 49 dams in western regions, water level currently is less than corresponding period last year.

However, water level currently is more than a last 10-year average. According to CWC, water level in 10 reservoirs of norther region and 26 dams of central regions have been higher than a year ago period as well as last ten year average.

Meanwhile, the government last week had set a marginally higher target of 332 million tonne (MT) of foodgrains production for the 2023-24 crop year (July-June) against the estimated output of 323.5 MT in the current crop year.

FROM THE FRONT PAGE



Semiconductor PLI window to remain open

When the scheme was first launched, the government had provided for financial support of up to 50% of project cost for at least two semiconductor and two display fabs for a minimum of six years. For others, like compound semiconductors, sensor fabs etc, fiscal support of 30% was to be offered.

So far, companies such as Vedanta-Foxconn JV, IGSS Ventures and ISMC have proposed to set up chip manufacturing plants with $13.6 billion investment and also sought support of $5.6 billion from the government under the incentive scheme. The government, however, is yet to approve the proposals. There have been reports that the Vedanta-Foxconn joint venture, whose plan is to manufacture chips of 40 nanometres, has not been able to tie-up with a technology partner as yet. "We will soon approve 40 nanometers fabrication and a packaging plant," Chandrasekhar said.

"India's first semiconductor is "not gone anywhere". This very complex and important project was finalising its manufacturing technology license agreement which is a critical piece of what's needed. Some of the world's leading semicon names are advisors to India Semicon Mission and are overseeing this evaluation," Chandrasekhar said in a tweet on Thursday. In the semiconductor space, the government has not just created opportunities in manufacturing, design and innovation in a span of 14 months but also introduced a brand new curriculum that will be implemented in higher education systems that will deliver 85,000 highly qualified professionals, Chandrasekhar said.

Apart from the semiconductor PLI scheme, Chandrasekhar said the government will also focus on incentive schemes for computer, telecom, automotive and IT Hardware. With regard to the revised IT Hardware PLI scheme, the government has increased the outlay by over two times to ₹17,000 crore and will approve the revised scheme by month end, according to Chandrasekhar. The IT hardware PLI scheme was launched to promote local manufacturing of products such as laptops, tablets, desktops, and servers. However, the companies cited lower incentives for them to start manufacturing in the first round. The ministry of electronics and information technology (MeitY) has now prepared a fresh draft of the production-linked incentive scheme to attract global majors like Dell and HP.

Adanis to raise funds for $5-bn war chest

An analysis by Bloomberg of exchange filings shows Adani Enterprises and Adani Transmission have sought board approval for fundraising every year in April or May since at least 2019. Adani Green Energy secured such permission every year except in 2021. The three firms raised almost $2 billion from Abu Dhabi-based International Holding Company PJSC in April last year.

But the current round of fundraising, once finalised, will be the first for Adani companies after the Hindenburg attack and the ensuing market rout. A successful share sale would go a long way toward cementing Adani's recovery from the crisis, though much would also depend on the terms of the deal and the profile of investors.

The stock meltdown earlier this year also cooled Adani companies' heated valuations. Added to the rout, a further discount could make them more attractive to investors.

—BLOOMBERG

Equity schemes inflows decline 68% m-o-m

Venkatesh added that Amfi expects gross monthly inflows through systematic investment plans to reach ₹17,000-18,000 crore per month by the end of the fiscal year, indicating substantial growth potential. "Investors must stay invested for the long term without getting swayed by market movement," he added.

The benchmark indices gained 3.6% in April. A steady decline in crude oil prices, earnings of major companies on expected lines, a potential pause on further interest rate hikes and commentary by the IMF, hinting the Indian economy is expected to grow at the fastest rate in the world, were some of the positives. In the hybrid fund category, arbitrage funds — which aim to generate profits by exploiting price differences of the same underlying assets in different segments — saw net inflows of ₹3,716 crore. The hybrid category saw total outflows of ₹3,317 crore.

Debt funds saw inflows of ₹1.06 trillion, led by categories having shorter maturity profiles. "Investors have preferred to invest in categories with shorter maturity profiles such as low duration, money market and short-duration funds since there is still some degree of uncertainty over the direction that the RBI could take regarding interest rates, going ahead.

Floater funds also received good net inflows given their ability to withstand changing interest rates scenario," said Srivastava. Net assets under management for the industry stood at ₹41.6 trillion as on April 30, 5.5% higher than that in the previous month.
